

I vehemently oppose any rule change that would make it possible for even fewer companies/individuals to control more media outlets, thus restricting diversity of opinion and, in many cases, prohibiting transmission of unbiased Truth. We currently have, instead of an independent "4th estate," rather a "5th column" working hand-in-glove with an unabashed right-wing governmental propaganda machine. We cannot have "Free Speech" in electronic/print and other forms of communication if 3 or 4 companies control 80-90% of all media types and control what is deemed "news worthy" or acceptable to broadcast.
